IEE Proceedings Part H
Microwaves, Antennas and Propagation
Vol. 135, 1988

ABBREVIATIONS

- p paper, address or lecture
- d discussion on a paper
- a abstract of paper or address
- e errata
- s synopsis of a paper published in full in another Part of the IEE Proceesings

Subject index

ALGORITHMS

New method for computing Dolph-Chebyshev arrays, and its comparison with other methods. F. Ares and E. Moreno p129

ANTENNAS

Double-sided printed arrays with large bandwidth. E. Levine, S. Shtrikman and D. Treves p54
Measurement of anechoic chamber reflections by time-domain techniques. E.N. Clouston, P.A. Langsford and S Evans p93
Synthesis of shaped-beam reflector antenna patterns. J. Bergmann, R.C. Brown, P.J.B. Clarriccats and H. Zhou p48

ANTENNAS (ACTIVE)

Loss calculations for rectangular coaxial lines. K.H. Lau p207

ANTENNAS (ADAPTIVE)

An alternative approach for designing narrowband antenna array processors with broadband capability. M.H. Er and B.P. Ng p111
Adaptive antenna array under directional and spatial derivative constraints. M.H. Er p414
Improving performance of monopulse phased array in direction finding. K.W. Lo and T.B. Vu p391
Technique for antenna array pattern synthesis with controlled broad nulls. M.H. Er p375

ANTENNAS (APERTURE)

Radiation from a flanged parallel-plate waveguide: Solution by moment method with inclusion of edge condition. M.S. Leong, P.S. Kooi and Chandra p249
Shaped patterns from a continuous planar aperture distribution. R.S. Elliott and G.J. Stern p366

ANTENNAS (ARRAYS)

Array synthesis with excitation constraints. G. Franceschetti, G. Mazzarella and G. Panariello p400
Design aspects and tolerances in array fed contour beam antennas of INTELSAT VI type. C.G. Parini, D. Brain, Y. Kalatizadeh, A.D. Olver and K. Raghavan p408
General radiation-pattern synthesis technique for array antennas of arbitrary configuration and element type. R.F.E. Guy p241
Improving performance of monopulse phased array in direction finding. K.W. Lo and T.B. Vu p391
Pattern synthesis for linear equal-spaced antenna array using an iterative eigenmodes method. W.-X. Zhang and Y.-M. Bo p167
Positions and magnitudes of fixed phase shifters in Butler matrices incorporating 90° hybrids. T.M. Macnamara p359
Simple expressions for mutual impedances. A.E. Gera p395
Superimposed dichroic microstrip antenna arrays. J.R. James and G. Andrasic p304
Synthesis of sub-arrayed monopulse linear arrays through matching of independently optimum sum and difference excitations. Derek A. McNamara p293
Synthesis of sum and difference patterns for two-section monopulse arrays. D.A. McNamara p371
Technique for antenna array pattern synthesis with controlled broad nulls. M.H. Er p375

ANTENNAS (DIPOLE)

Design of log-periodic dipole antennas. C. Peixeiro p98
Double-sided printed arrays with large bandwidth. E. Levine, S. Shtrikman and D. Treves p54
Fourier series treatment of the sleeve monopole antenna. A.D. Wunsch p217
Scattering of a long dipole field by parallel cylindrical scatterers. H.A. Ragheb and M. Hamid p118
Simple expressions for mutual impedances. A.E. Gera p395

ANTENNAS (HORNS AND FEEDS)

Bandwidth of a square hard horn. Per-Simon Kildal p275
Dielectric cone loaded horn antennas. A.D. Olver, P.J.B. Clarricoats and K. Raghavan p158
Gaussian beam model for aperture-controlled and flareangle-controlled corrugated horn antennas. P.-S. Kildal p237
Inexpensive multi-mode satellite tracking feed antenna. P.D. Patel p381
Wide angle corrugated horns analysed using spherical modal-matching. A.D. Olver and J. Xiang p34

ANTENNAS (MEASUREMENTS)

Measurement of anechoic chamber reflections by time-domain techniques. E.N. Clouston, P.A. Langsford and S Evans p93
Phase retrieval radio holography in the Fresnel region: Tests on the 30 m telescope at 86 GHz. D. Morris, H. Hein, H. Steppe and J.W.M. Baars p61
Practical method of predicting transient fields and monopole current waveforms. D.M. Parkes and P.D. Smith p231

ANTENNAS (MICROSTRIP)

Analysis of suspended microstrip taper baluns. B. Climer p65
Conformal microstrip arrays on cylinders. J. Ashkenazy, S. Shtrikman and D. Treves p132
Coplanar corporate feed effects in microstrip patch array design. P.S. Hall and C.M. Hall p180
Curve-fitting formulas for fast determination of accurate resonant frequency of circular microstrip patches. Q. Liu and W.C. Chew p289
Discrete image theory for horizontal electric dipoles in a multilayered medium. D.G. Fang, J.J. Yang and G.Y. Delisle p297
Input impedance and loaded quality factor of a probe exciting dielectric resonator. S. Vigneron and P. Guillon p163
Input impedance of rectangular microstrip antennas. A.K. Bhattacharjee, S.R. Bhadra Chaudhuri, A. Mukherjee, D.R. Poddar and S.K. Chowdhury p351
Simple design formulas for circulatory polarised microstrip antennas. Y.T. LO, B. Engst and R.Q. Lee p213
Simple model for the input impedance of coax-fed rectangular microstrip patch antenna for CAD. F. Abboud, J.P. Damiano and A. Papiernik p323
Superimposed dichroic microstrip antenna arrays. J.R. James and G. Andrasic p304

ANTENNAS (REFLECTORS)

Application of spherical wave expansions to direct GO far field synthesis. M.J. Mehler p41
Multiple dielectric loaded perforated screens as frequency selective surfaces. R. Orta, R. Tascone and R. Zich p75
Phase retrieval radio holography in the Fresnel region: Tests on the 30 m telescope at 86 GHz. D. Morris, H. Hein, H. Steppe and J.W.M. Baars p61
Spherical wave expansions for shaped beam synthesis. M.J. Mehler p327

ANTENNAS (SLOT)

Moment method analysis of a feeding system in a slotted-waveguide antenna. W. Hanyang and W. Wei p313
Resonance characteristics of waveguide slot radiators with moderate width-to-length ratios. A.J. Sangster and A.H.I. McCormick p319

ANTENNAS (THEORY)

Array synthesis with excitation constraints. G. Franceschetti, G. Mazzarella and G. Panariello p400
Closed-form approximation to the bounded part of the exact kernel of a cylindrical antenna integral equation. A. Karwowski p210
Design aspects and tolerances in array fed contour beam antennas of INTELSAT VI type. C.G. Parini, D. Brain, Y. Kalatizadeh, A.D. Olver and K. Raghavan p408
General radiation-pattern synthesis technique for array antennas of arbitrary configuration and element type. R.F.E. Guy p241
Radiation from a flanged parallel-plate waveguide: Solution by moment method with inclusion of edge condition. M.S. Leong, P.S. Kooi and Chandra p249
Spherical wave expansions for shaped beam synthesis. M.J. Mehler p327
Synthesis of sum and difference patterns for two-section monopulse arrays. D.A. McNamara p371

ANTENNAS (TIME DOMAIN)

Measurement of anechoic chamber reflections by time-domain techniques. E.N. Clouston, P.A. Langsford and S Evans p93
Practical method of predicting transient fields and monopole current waveforms. D.M. Parkes and P.D. Smith p231

ANTENNAS (TRAVELLING WAVE)

Design of microstrip exponentially tapered lines to match helical antennas to standard coaxial transmission lines. S.P. Mathur, A.K. Sinha and A.K. Sinha p272
Improved design of the vivaldi antenna. Ehud Gazit p89

ANTENNAS (WIRE)

Dielectrically loaded wire antennas. J.P. Casey and R. Bansal p103
Frequency-domain analysis of a large NEMP-simulator wire antenna. B.D. Popović p135

ARRAY PROCESSING

New method for computing Dolph-Chebyshev arrays, and its comparison with other methods. F. Ares and E. Moreno p129

ATTENUATORS

Correlation properties of rainfall rates in the United Kingdom. H. Fukuchi p83

CALIBRATION

The six-port reflectometer and its complete calibration by four stadard terminations. F.M. Ghannouchi and R.G. Bosisio p285

CIRCUIT THEORY AND DESIGN

Dual resonance. D. Kajfez p141

COMPONENTS

Analysis of harmonic injection frequency dividers with three-terminals devices. F. Sierra and J. Pérez p70
Resonance frequencies and behaviour of the impatt cap oscillator. J.R.G. Twisleton p196

COMPUTER APPLICATIONS

Modified least squares method with application to diffraction and eigenvalue problems. LJ. Stanković and S. Jovićević p339
New method for computing Dolph-Chebyshev arrays, and its comparison with other methods. F. Ares and E. Moreno p129

COMPUTER-AIDED DESIGN

Design and layout of microstrip structures. F.E. Gardiol p145
Design of log-periodic dipole antennas. C. Peixeiro p98

DIELECTRIC MATERIALS

Improved design of the vivaldi antenna. Ehud Gazit p89
Novel method of measuring dielectric properties at 100 GHz using a grooveguide resonator. Y.M. Choi p138
Solution of the resonant frequencies of a cavity resonator by boundary element method (BEM). W. Geyi and W. Hongshi p361
Solution of the resonant frequencies of a microwave dielectric resonator using boundary element method. W. Geyi and W. Hongshi p333

ELECTROMAGNETIC THEORY

Closed-form approximation to the bounded part of the exact kernel of a cylindrical antenna integral equation. A. Karwowski p210
Scattering of a long dipole field by parallel cylindrical scatterers. H.A. Ragheb and M. Hamid p118

TM scattering from a conducting cylinder of arbitrary cross-section covered by multiple layers of lossy dielectrics. E. Arvas, M. Ross and Y. Qian p226

ELECTRONIC CIRCUITS

Resonance frequencies and behaviour of the impatt cap oscillator. J.R.G. Twisleton p196

FERRITES AND FERROMAGNETICS

E-plane finline circulator using coupled H-plane turnstile resonators. J. Helszajn, G. McDonald and D. Sutherland p279

MATHEMATICAL TECHNIQUES

Admittance of a longitudinal slot in a ridge waveguide. K. Falk p263
Application of finite-element method to arbitrarily shaped discontinuities in a dielectric slab waveguide. M. Koshiba and K. Hirayama p8
Application of spherical wave expansions to direct GO far field synthesis. M.J. Mehler p41
Array synthesis with excitation constraints. G. Franceschetti, G. Mazzarella and G. Panariello p400
Beam propagation method applied to a step discontinuity in dielectric planar waveguides. L.R. Gomaa p205
Eigenvalues of propagating waves in a circular waveguide with an impedance wall. A.Z. Elsherbeni, J. Stanier and M. Hamid p23
Field theory analysis of multiport-multidiscontinuity structures: application to short-circuited *E*-plane septum. J.M. Rebollar and J.A. Encinar p1
Kummer and Tricomi functions for analysis of circular gyrotropic waveguides with azimuthal magnetisation. K.P. Ivanov and G.N. Georgiev p125
Spherical wave expansions for shaped beam synthesis. M.J. Mehler p327
TM scattering from a conducting cylinder of arbitrary cross-section covered by multiple layers of lossy dielectrics. E. Arvas, M. Ross and Y. Qian p226
Wide angle corrugated horns analysed using spherical modal-matching. A.D. Olver and J. Xiang p34

MATRIX ALGEBRA

Matched waveguide five-port with partial symmetry for use in six-port measurement systems. G.P. Riblet p13

MICROSTRIP AND STRIPLINE

Analysis and optimal design of microstrip sensors. K.B. Khalid, T.S.M. Maclean, M. Razaz and P.W. Webb p187
Coplanar corporate feed effects in microstrip patch array design. P.S. Hall and C.M. Hall p180
Design and layout of microstrip structures. F.E. Gardiol p145
Design of microstrip exponentially tapered lines to match helical antennas to standard coaxial transmission lines. S.P. Mathur, A.K. Sinha and A.K. Sinha p272

MICROWAVE ACTIVE COMPONENTS

Matching network characterisation by *S*-parameter measurements of two-port active devices. R. Soares, P. Gouzien and P. Legaud p426

MICROWAVE CIRCUITS AND NETWORKS

Feedforward linearization of 950 MHz amplifiers. R.D. Stewart and F.F. Tusubira p347
Loss calculations for rectangular coaxial lines. K.H. Lau p207
Matching network characterisation by *S*-parameter measurements of two-port active devices. R. Soares, P. Gouzien and P. Legaud p426
Power amplifier for microwave digital radios with inherent phase compensation. P. Bura, D. Gelerman and P. Ntake p344

MICROWAVE INTEGRATED CIRCUITS

Curve-fitting formulas for fast determination of accurate resonant frequency of circular microstrip patches. Q. Liu and W.C. Chew p289

MICROWAVE MEASUREMENTS

Alternative approach to the calibration of six-port reflectometers using four standards. S.P. Yeo and A.L. Ang p353
Dual resonance. D. Kajfez p141
Extension of Open Resonator Measurement Technique to achieve fast detailed results over wide bandwidth (8–12 GHz). A.L. Hume and L.J. Auchterlonie p431
Solution of the resonant frequencies of a microwave dielectric resonator using boundary element method. W. Geyi and W. Hongshi p333

MICROWAVE PASSIVE COMPONENTS

Analysis of suspended microstrip taper baluns. B. Climer p65
Designing a symmetrical five-port waveguide junction. A.L. Cullen and S.P. Yeo p17
Double-sided printed arrays with large bandwidth. E. Levine, S. Shtrikman and D. Treves p54
Eigenvalues of propagating waves in a circular waveguide with an impedance wall. A.Z. Elsherbeni, J. Stanier and M. Hamid p23
Field theory analysis of multiport-multidiscontinuity structures: application to short-circuited *E*-plane septum. J.M. Rebollar and J.A. Encinar p1
Positions and magnitudes of fixed phase shifters in Butler matrices incorporating 90° hybrids. T.M. Macnamara p359

MODELLING

Computer-aided modelling of discrete high-frequency transistors. K.B. Kumar and V.M. Pandharipande p171

NONDESTRUCTIVE TESTING

On the PSF of a forward-scattering coherent tomographic technique. M. Bramanti and E.A. Salerno p356

NUMERICAL ANALYSIS

Closed-form approximation to the bounded part of the exact kernel of a cylindrical antenna integral equation. A. Karwowski p210
Curve-fitting formulas for fast determination of accurate resonant frequency of circular microstrip patches. Q. Liu and W.C. Chew p289
Dielectrically loaded wire antennas. J.P. Casey and R. Bansal p103
Discrete image theory for horizontal electric dipoles in a multilayered medium. D.G. Fang, J.J. Yang and G.Y. Delisle p297
Fourier series treatment of the sleeve monopole antenna. A.D. Wunsch p217
Frequency-domain analysis of a large NEMP-simulator wire antenna. B.D. Popović p135
Matching network characterisation by *S*-parameter measurements of two-port active devices. R. Soares, P. Gouzien and P. Legaud p426
Moment method analysis of a feeding system in a slotted-waveguide antenna. W. Hanyang and W. Wei p313
Pattern synthesis for linear equal-spaced antenna array using an iterative eigenmodes method. W.-X. Zhang and Y.-M. Bo p167
Simple expressions for mutual impedances. A.E. Gera p395
Simple model for the input impedance of coax-fed rectangular microstrip patch antenna for CAD. F. Abboud, J.P. Damiano and A. Papiernik p323
Solution of the resonant frequencies of a cavity resonator by boundary element method (BEM). W. Geyi and W. Hongshi p361
Synthesis of sub-arrayed monopulse linear arrays through matching of independently optimum sum and difference excitations. Derek A. McNamara p293

OPTICAL WAVEGUIDES

Application of finite-element method to arbitrarily shaped discontinuities in a dielectric slab waveguide. M. Koshiba and K. Hirayama p8

PERMITTIVITY

Analysis and optimal design of microstrip sensors. K.B. Khalid, T.S.M. Maclean, M. Razaz and P.W. Webb p187

RADIO ASTRONOMY

Phase retrieval radio holography in the Fresnel region: Tests on the 30 m telescope at 86 GHz. D. Morris, H. Hein, H. Steppe and J.W.M. Baars p61

RADIO-WAVE PROPAGATION (MICROWAVE)

Available time statistics of rain attenuation on earth-space path. H. Fukuchi and Y. Otsu p387

SATELLITE LINKS AND SPACE COMMUNICATION

Available time statistics of rain attenuation on earth-space path. H. Fukuchi and Y. Otsu p387
Inexpensive multi-mode satellite tracking feed antenna. P.D. Patel p381
Synthesis of shaped-beam reflector antenna patterns. J. Bergmann, R.C. Brown, P.J.B. Clarricoats and H. Zhou p48

SPACE COMMUNICATION

Application of spherical wave expansions to direct GO far field synthesis. M.J. Mehler p41

TRANSISTORS

Computer-aided modelling of discrete high-frequency transistors. K.B. Kumar and V.M. Pandharipande p171

TRANSMISSION LINES

Input impedance of rectangular microstrip antennas. A.K. Bhattacharjee, S.R. Bhadra Chaudhuri, A. Mukherjee, D.R. Poddar and S.K. Chowdhury p351
Loss calculations for rectangular coaxial lines. K.H. Lau p207
Semi-analytical method for computing input impedance of general nonuniform transmission line. O.O. Ajayi and S.O. Ajose p269

WAVEGUIDES AND WAVEGUIDE COMPONENTS

Admittance of a longitudinal slot in a ridge waveguide. K. Falk p263
Alternative approach to the calibration of six-port reflectometers using four standards. S.P. Yeo and A.L. Ang p353
Application of finite-element method to arbitrarily shaped discontinuities in a dielectric slab waveguide. M. Koshiba and K. Hirayama p8
Cylindrical waveguide mode convertor for azimuthally symmetric transverse electric modes. S.R. Seshadri p420
Designing a symmetrical five-port waveguide junction. A.L. Cullen and S.P. Yeo p17
E-plane finline circulator using coupled H-plane turnstile resonators. J. Helszajn, G. McDonald and D. Sutherland p279
Eigenvalues of propagating waves in a circular waveguide with an impedance wall. A.Z. Elsherbeni, J. Stanier and M. Hamid p23
Field theory analysis of multiport-multidiscontinuity structures: application to short-circuited *E*-plane septum. J.M. Rebollar and J.A. Encinar p1
Kummer and Tricomi functions for analysis of circular gyrotropic waveguides with azimuthal magnetisation. K.P. Ivanov and G.N. Georgiev p125
Matched waveguide five-port with partial symmetry for use in six-port measurement systems. G.P. Riblet p13
Modified least squares method with application to diffraction and eigenvalue problems. LJ. Stanković and S. Jovićević p339
Quasistatic characteristics of slotted parallel-plate waveguides. H.A. Auda p256
Resonance characteristics of waveguide slot radiators with moderate width-to-length ratios. A.J. Sangster and A.H.I. McCormick p319
